Accubid Releases Pocket ChangeOrder™ for the Pocket PC

Toronto, Canada, October, 2003

Accubid is excited to announce the release of Pocket ChangeOrder for the Pocket PC. With Accubid's new Pocket ChangeOrder™ for the Pocket PC, you can price changes while you're still at the job site. Don't wait until you're back at the office to evaluate the full impact of contemplated changes—impress your clients with your immediate and on-the-spot response. You can also download projects onto Pocket ChangeOrder to allow for on-site project management.

Back at the office, you can synchronize your Pocket ChangeOrder with ChangeOrder or ChangeOrder Pro—Accubid's desktop solutions for change order management. Then, print or e-mail detailed and professional reports, and watch your change order approval rate grow!

Pocket ChangeOrder will run on any portable device that uses Microsoft's Pocket PC 2002 operating system, or its successor, the Windows

Mobile operating system. Since the Pocket PC and Windows Mobile operating systems are based on the Windows OS, existing Windows users will find the Pocket PC interface familiar and easy to use.

Features:

While other handheld software for contractors has focused exclusively on takeoff, Accubid has produced a complete solution from takeoff to bid summary, including extension.

Pocket ChangeOrder features include:

- Full extension and bid summary
- Can generate a final price on the spot, unlike some solutions that simply produce the total quantities of items

- Can update from Pocket PC to desktop and back, unlike some solutions that can only update in one direction, from the device to the desktop
- Supports the complete Accubid desktop database
- Supports multiple databases and projects on the device at the same time
- Fully customizable screens (fonts, colors and columns)
- Interface is similar to Accubid's desktop ChangeOrder and ChangeOrder Pro, thereby reducing the learning curve for existing Accubid users

Benefits

Here are just a few of the benefits of Pocket ChangeOrder:

- Reduces delay, since you can price changes immediately and on-the-spot
- Reduces errors, since you don't have to rely on your memory or your notes
- Saves time, since you don't have to transcribe your notes
- Allows for on-site project management (since you can download projects to Pocket ChangeOrder for reference)
- Avoids duplication since it can synchronize and share files with the desktop version of ChangeOrder.
