For Immediate Release

Accubid Releases ChangeOrder Version 6

Toronto, Canada, March, 2005

Accubid is pleased to announce the release of Version 6 of ChangeOrder and ChangeOrder Pro—Accubid’s change order management software for contractors. Version 6 includes a number of exciting new features and enhancements to help contractors better manage changes and increase their change approval percentages, including enhanced report features, temporary assemblies, spell checking, text formatting, and export to Excel, among many others.

ChangeOrder and ChangeOrder Pro allow you to manage contract variations, and to produce consistent and professional-looking change notices. With ChangeOrder and ChangeOrder Pro, you can assess the big picture and see how change orders impact the project from start to finish. ChangeOrder Pro’s premium features include more database assemblies, more specialized takeoff types, typical takeoffs, and labor factor adjustment for takeoff breakdowns.

Both ChangeOrder and ChangeOrder Pro work seamlessly with Pocket ChangeOrder™, Accubid’s award-winning handheld change order management solution for the Pocket PC. Using Pocket ChangeOrder (which is sold separately), contractors can price changes while they’re still at the job site, and impress clients with their immediate and on-the-spot response.

For more information on ChangeOrder and ChangeOrder Pro, visit our website at www.accubid.com or phone 1-800-ACCUBID (222-8243).

Accubid Systems is the leading provider of estimating, billing, and project management software for electrical and mechanical contractors. Accubid’s software solutions are used by over 14,500 active users in over 4,300 companies across North America. Accubid offers proven solutions for all aspects of the construction process, from estimating to purchasing to project management and billing. Accubid also offers a wide range of professional development courses and product training labs.
