Accubid Releases Version 2 of Pocket Bid™ and Pocket ChangeOrder™

Toronto, Canada, July, 2005

Accubid is pleased to announce the release of Version 2 of Accubid's Pocket Bid™ and Pocket ChangeOrder™ solutions for the Pocket PC.

With Pocket Bid, you can perform a complete estimate, generate a bill of materials, and produce a final price, right on the job site (or anywhere else, for that matter).

With Pocket ChangeOrder—1st prize winner for new software at the 2003 ISH North America show—you can impress your clients with your immediate and on-the-spot response by pricing changes while you're still at the job site. You don't have to wait until you're back at the office to evaluate the full impact of contemplated changes.

You can also download projects onto Pocket ChangeOrder to allow for on-site project management.

Back at the office, synchronize Pocket Bid or Pocket ChangeOrder with your corresponding Accubid desktop solution—Accubid Pro, BidWinner Plus, BidWinner, or PowerBid for Pocket Bid, and ChangeOrder or ChangeOrder Pro for Pocket ChangeOrder.

Version 2 of Pocket Bid and Pocket ChangeOrder both include a new Material Adjustment column on the Extension screen, support for drawing, area, and phase breakdowns during takeoff, and the ability to sort the extension by drawing, area, and phase.

Both Pocket Bid and Pocket ChangeOrder run on any portable device that uses Microsoft's Pocket PC 2002 or Windows Mobile 2003 operating system. Since these operating systems are based on the Windows OS, you'll find the Pocket PC interface familiar and easy to use.

For more information, visit our website at www.accubid.com or call 1-800-222-8243.
