## Accubid Releases Version 2 of cadLive

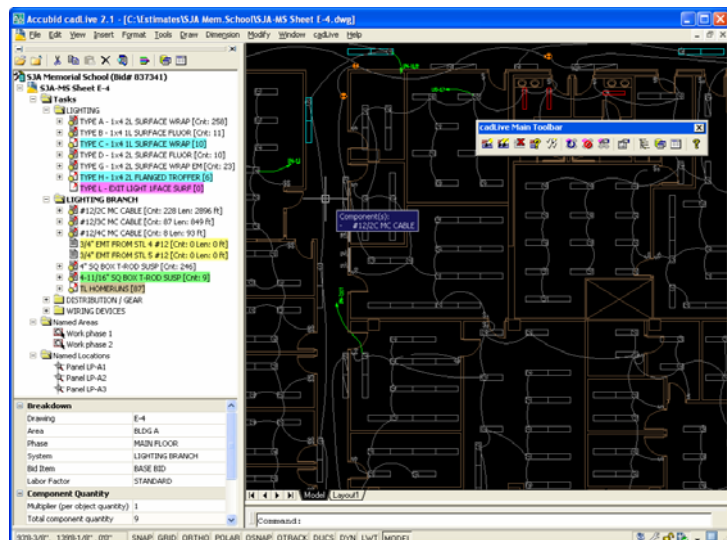

Toronto, Canada, October, 2006

Accubid is proud to release version 2 of cadLive™, our next generation CAD-based estimating solution for contractors. cadLive 2 offers improved performance and exciting new features, including:

- full support for Accubid Estimating 7 and AutoCad 2007
  - access to all database components including specialized takeoffs
  - ability to build and edit all job assembly components within cadLive
  - ability to edit the estimating job without closing cadLive
  - new Named Location feature allows multiple destination lengths such as panels
- improved sorting, grouping and filtering capabilities
  - improved handling of multiple tasks, including drag & drop between folders
  - faster network performance and requantification performance

cadLive™ is the next generation CAD-based estimating solution for contractors. cadLive allows you to produce faster and more accurate takeoffs that are automatically incorporated into your Accubid estimate. cadLive is fully integrated with Accubid estimating solutions—Accubid Pro, BidWinner Plus, BidWinner, and PowerBid—and features a bi-directional, real-time link between the two applications. That translates into complete data synchronization

with no need to import or export takeoffs or breakdowns.

- Count and measure at computer speed, not human speed
- Minimize human error and produce more accurate results
- Drag and drop to assemble your takeoff
- Fully integrated with Accubid's estimating solutions

Accubid Systems is the leading provider of estimating, billing, and project management software for electrical and mechanical contractors. Accubid products are used by over 14,500 active users in over 4,300 companies across North America. Accubid offers proven solutions for all aspects of the construction process, from estimating to purchasing to project management and billing. Accubid also offers a wide range of professional development courses and product training labs.
