

## Electrical Estimating / Software Trainer

### Summary

The Trainer will be responsible for delivering training, as well as providing technical and industry related assistance for Accubid's productivity software.

### Measure of Success

- Provide instruction and support either on –site, in-class or on-line
- Assist product support as needed
- Detail all instruction and support incidents within the corporate CRM tool
- Solicit post-event feedback and facilitate event evaluation/review process
- Report back to Product/Segment Management any product challenges and or areas to improve
- Assist in developing training courseware
- Learn new products and features as they become available, and incorporate knowledge into courseware and content delivery
- Identify possible sales opportunities either during events or when one-to-one with clients, and forward feedback to the sales organization

### Travel Requirements

- The instructor can expect to travel throughout North America about 50-75% of the time
- Non-travel time is to be spent delivering services either via telephone and/or on-line, or working on departmental projects and course-ware

### Required Qualifications

- Proficient in the use of Accubid software, specifically Accubid Estimating, Change Order and Time and Material Billing software
- Proven experience as an electrical estimator in the construction industry
- Minimum 2-year college and/or technical institute diploma in construction and or engineering field (4 yr. degree preferred)
- Certification as journeyman or technologist/engineer
- Strong interpersonal and communications skills

### Desired Qualifications

- Certificate/diploma in adult education
- Experience in teaching and training of adults
- Extensive public speaking experience
- Completion of Accubid education and training courses
- Proficiency with Microsoft Office products (Excel, Word, Powerpoint)
